

Instalatie electrica universală 13 pini pentru carlig de remorcare cu modul electronic

Lights Sender 2

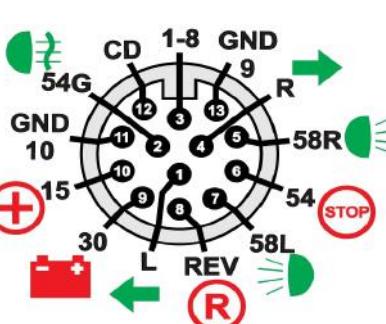

„Lights Sender 2” este modul de protectie pentru instalatia electrica si a componentelor electronice (ABS, ESR, ESP, computer bord, echipamente, audio, clima etc...), la autoturisme si autoutilitarele din generatia noua si este indispensabil pentru a preveni suprasarcina in instalatia electrica si electronica a autoturismului sau autoutilitarei. Modul este compatibil cu toate tipurile de autoturisme si autoutilitare, care functioneaza cu 12V. Modulul se poate utiliza la modelele cu CAN Bus, multiplex, check-control, sisteme cu tensiune pulsatorie (PWM).

MULTIPLEX VW / MERCEDES

Cabluri de control - lampi spate auto

SPECIFICATIILE MODULULUI

Putere	12V
Curent consumat pe intrarea modului	1mA
Curent de ieșire	10A

Culori: cabluri de priza remorca 13 pini / cabluri de control
